erries were slightly wanker due inferior quality of the burry than couse but a very satisfactory de-

apply of California cherries is in every day and while they are not fiful they are becoming conspicuous at ade. Prices stand at \$2,00@2.25 for

of oranges arrived but were almost d under the pressing demand of the

Pacific coast mail advices in connection with dried fruits have the following: "The market is practically cleaned up of peaches, apples and apricots, and while there are us appears and approved, and while there are no changes in quotations yet slightly higher prices would have to be paid. Prunes are slow; some San Benite, equal to Santa Clarus, were offered on the market. Heiders ask for Santa Claru 1901 for 1990 quetations are hard to get. Some speculative prices are named for future fruits, but it view of the large crop prospects buyers do not pay any attention to them. After the 15th price will probably be named by responsible packers on some varieties."

and that it is equal to the best that has rexas and that it is equal to the best that has rexas Pipe existed in former days. The opposite course Texas

Interprete will probably be named by responsible packers on some varieties."

Thos J. Meehan & Co., of Baltimore, responsible packers on some varieties."

A fair business was done bere during the past week in tenatioes, com and peaches, for "spot" delivery, but "futures," with the exception of pineapples, were not as active as they have keen, neither was the bolance of the list. A dull market for a week or two makes some difference in the feelings of the packers even whos the ages erai trade conditions are favorable.

The general Hist shows no changes of importance. Peas can be bought at a little lower range of prices, but all the other articles in the line of vegetables are firm. Not fixed prices are yet being made by the Baltimore packers on any grade of peas for "turure" pineapples and reasonable prices in the inquiries for them are increasing every week. The sales of "future" pineapples must be gratifying to the packers on any grade of peas for "turure" delivery, but the inquiries for them are increasing every week. The sales of "future" pineapples and reasonable prices is satisfactory to all concerned. If indications can be relied out the peach crop of the packers week in a point of quality as well as quantity.

Willett & Gray say of sugay: "As regards the limited parts of the packers, and as to the amount of cotton market to plant the peach crop of the pineapples and reasonable prices in the peach crop of the packers, and as to the amount of cotton market opened firm with prices 4 to 7 joints higher the packers, and as to the amount of cotton market opened firm with prices 4 to 7 to the high high and were a strained light receipts and control of the distance of the firm with prices 4 to 7 to the packers, well as quantity.

Willett & Gray say of sugay: "As regards the limited parts and the control of the control of the limited parts and the control of the limited parts and the control of a fairs indicates that the securities are being classified by investors and there is no timities are being classified by Victor took a spurt and 2% cents would bave been readily given for the stock. Am. Oil and Re-fining Co (new) Am. Oil and Re-Houston, May 13.-Liverpool advices in cotton this morning were quite a surprise as a decline was expected, but instead near deliveries closed 2½-tidd higher, encouraging the bulls in our markets to advance prices. A general disposition to realize was noted, however, upon the early advance, and the markets not getting much new burling encouraged the bear, element to hammer. The markets not getting much new buying encouraged the bear element to hammer. The government report issued in the forenoon was a beartsh decument, and helped the decline materially, cotton being thrown overheard by brokers on stop loss orders, the weakness continuing to the close, last prices being the lowest of the day. The weather forecasts call for shewers and rains in many sections of the cotton beit where complaints have been made of not sufficient moisture. Mississippi and Alabama are sadly in need of more rain, and, while crop prospects in Texas seem to be very good, this State needs a great deal of rain. Mexican weevils are reported from many points in the southern half of Texas, and there now seems little question but that they will again do unteild injury to to the crop. The work of these pests is not visible from car windows. Cotton has had a decline of \$4 per bale, and if at any time this season it was worth in the neighborhood of loe, it certainly should be cheap now at 9c. Even with the prospects for a bumper crop, the spot situation for the next few meanths can not be anything but strong, and purchases of the summer months on such depressions as we saw today should be remunerative.

Liverpool is due to be 7-64d lower tomorrow.

Cargill & Richardson.

H. & B. Beer's Letter. Enterprise
El Paso
Equitable Land
and Oil
Export Oil and

H. & B. Beer's Letter. (Special to The Post.) influenced Liverpool favorably, and our market in sympathy opened 7 bigher on old crop options and 3 on new. There was very little trading until the issuance of the weekly weather report, which was favorable, and this, coupled to the heavy New Orleans estimate for tomorrow, occasioned realizing, causing a break of 19 to 20 points from the top, making the net loss on the day 13 to 15 points.

The summary of the weekly weather reports respecting cotton are received from all parts of the conton belt, with the exception of Louisians and portions of inland districts, where rain is needed to generate the late planted. Vigorous growth is reported from both the eastern and western districts with good stands and clean felds. Cool aights have been injurious in Tennessee.

It is cisimed the present growing crop has a better start agd is earlier than for the conton of t

cool aights have been injurious in real persections. It is claimed the present growing crop has a better start and is earlier than for some years back. With such a promising outlook for the hext crop, and the opinion gaining ground that there is a sufficiency of cotion for the world's requirements this season holders became uneasy, precipitating the sharp decline established today. Recepts and the demand for spots will continue to influence aid crop months, whereas the new will be regulated by weather coptinue to influence aid crop months whereas the new will be regulated by weather coptinue to influence aid crop months. Beer, ditions.
